DESCRIPTION

Compacted clay-silt found on W side of cutting, separated from 15200 by baulk. Seems to be delineated by 15207 + 15208 but this possibly coincidental. Sticky, red-yellow + color

Comments

Kilnwash? This may be a compacted strip of silt. It has an unusually high clay content, and this may falsely give it a compacted appearance. It may be the result of path activity, wearing through the stone layer 15206/15216
