F. 353 Depths:

16/7/71

hole w. semi-circular outline, w. of F. 352:
patch of soft earth w. few stones. produced pot, bone
flint from top area

20/7/71

Further excavation in this area produced more finds
of pot, bone, flint, & showed softish earth / small stone
fill: but diff. to find edges, either from F. 352a, or
from surrounding brown earth & stone layer. Possibly
solution hollow in CLS

14/7/71

F. 354 Planned

hole c. 1 m from internal angle of cutting,
just within W. leg. Fill of m. stones & earth
apparent on top. Found to be c. 50 cm deep to rock only
but w. app. cut edge: when ragstone capping scraped
354 nearly disappeared.
