COMMENT

joint pattern, Yellowish colour.

Appears to be laid over gull edge in west of B IX extn [1]

II After three weeks exposure this area can be seen to be bedrock. Possibly another stratum within the same series.

PHASING

P.T.O.

Description continued.

Colour difference has faded with time! As for
apparent laying of (414) over gull edge - the fact
that this stratum has shattered within its separate laminations,
as opposed to the vertical frost-shattering elsewhere is deceptive.
