

CH 72

CONTEXT F 573....

CUTTING ... B XII CO-ORDINATES: East..... North.....

DATE EXPOSED August 4th DATE COMPLETED

DESCRIPTION longhouse post hole. This posthole contains a lot of burnt red oolite from the top of the hole down to as far as has been excavated. There are many large stones in the post hole which makes excavation to the very bottom impossible without damaging the section edge. At approximately 10cms

MAX. WIDTH AND DIRECTION ... 58cm diameter..... ↓

ASSOCIATED FEATURES F570, F571, F572, F573, F574 and F575 (whose centres are about 240cms from each other) and form a possible rectangular building consisting of six post holes running almost parallel

ASSOCIATED FINDS

A few pieces of burnt pot

(with the roadway
(F544 and F545)
(also conneted)

↓
~~COMMENT~~
below the datum line a few pieces of burnt pot were removed. The rain has delayed further drawing and the remainder of the posthole was not completed until much later. This post hole look as if it is linked up with F570, F571, F572, F574 & F575 (whose centres are about 240cms from each other) and form a possible rectangular building consisting of six post holes running almost parallel to the roadway?
