

F714

1

Burnt-stone line on top of Neo-rampart.
Ties in with F573 (CII) - palisade trench.
Revealed by removal of ①.

18th July.

Burned stones removed: seems to produce a fairly well-defined upper edge, but the lower edge, especially towards the gull, is not very precise. Finds of pot, flint, from ? below lower edge - i.e. behind feature.

Continues S. into gull, then burnt stone peters out.

At N., goes into bank between pgs 1, 2, with a gap of ≈ 2 m, where the stone is markedly different to the rest of the bank, being yellowish, and larger.
