COMMENT

Iron Age pit to south of mound partly abutting through
stone of the craggy 'building' sealed by mound.
What I originally called F3198 (1) appears to be a
separate local ancillary feature cut into the top of F3198 (i.e.
F3199) so F3198 (2) finds become F3198 (1) or F3198 (3) finds
should become F3198 (2). F3198 (1) finds become F3199.
