ASSOCIATED FINDS

COMMENT *This is the final rubble collapse of the rampart, and is located downslope (i.e. E) of 7501; in the SE corner of E.17 7530 fills a cut hollow in the pre-existing "clean" rubble fill of the ditch*

PHASING *1-8-86*: *this fill is probably a relatively recent intrusive cut, backfilled. The grey, dusty soil indicates this.*

*P. 5.*
