COMMENT

Continuation of 7581: if so, does it imply a change
in the structure of the putative wall line of 7581/7588?
An excavation, this burnt band was found to contain no
p.h.'s, and its large rubble fill differed in no way from that
surrounding it, laterally and vertically. The fact that 7588 overlay
a more independent level of burnt rocks might cast doubt on its having
been a continuation of 7581.
