If no, explain why

Geobase code:

DESCRIPTION

a line of worn stones, some sized: some
this sits in a bed of compacted soil resistant to
cleaning. It places small chert & occasional limestone
stones through.

Comments

This may be kicked up stones caused by the path overlying it
The path is certainly responsible for the wear. The stones may be
scatter associated with the quarry 30m to the north of the section
The compacted earth may be buried half under quarry dump
