CONTEXT F ..16.....

CUTTING A III CO-ORDINATES: East..... North.....

DATE EXPOSED DATE COMPLETED

DESCRIPTION Post hole. Cut through bedrock but none of the layers above that. There was no road surface covering the post hole, which bordered on the south side of the mass of meringue (see plan) it appears that some of the surrounding rag stone may have worn off since the cutting of the post hole which would account for its shallowness when compared with the

MAX. WIDTH AND DIRECTION ... 52 cm diameter

↓ apparently corresponding post hole on the north side Fill
The post hole itself is well rounded in plan and well cut
with smooth sides,

(X-section) ① Fill layer 1 ~~very~~ grey silty earth with stone packing
Layer 2 Crumbly yellowish fill consisting largely of eroded
and dissolved limestone. A negligible amount of charcoal
in layer 1

(X-section) ② Fill. layer 1 Grey soil with a great deal of
PHASING 'fluffy' white fur covering of calcium salts (?) on small
stones and charcoal (Charcoal small and widespread)
No silt or breaks in the fill.
