

2035 Ditch below bank F.2005. Sealed by F.2005 (3)

2036 Ditch below bank F.2005 (3)

2037 Hollow at S. end of CV, to W. of 2036. Possibly sealed by CV(4), but possibly filled by it.

2038 Pre-bank (pre 2005) occupation N. of 2029. Small stones & soil, below 2005 (2), & if a causewayed ditch is present N. of 2035, then this feature would be an intervening occupation.

2039 = CV (5) : Hollow below CV(4) W. of F.2005 bank area, & well sealed by washed stones & rubble from the bank. Prob. a ditch.

2040 Apparent intrusion in Strip 1: runs from S. bank & stops within bank between Strips 1 & 2. Cuts CV (4a). Small stones, chipples, brown soil. May cut CV(2), but uncertain. Unnoticed when excavated: finds assigned to (2) & (4) (these may be retrieved from their triangulations).

2041 Group of large & medium stones within tumble of F.2010 (2) at corner near peg J. Very worn (rain) & burnt. No proper hearth structure, but they seem to be a feature overlies F.2010 (3). Wall foundation?

2042 P.h? below CV(2) just S. of line of modern wall. See P. 30

2043 P.h. " " " " " " " " " " " "

2044 Area of disturbed rock rubble. Below CV(2), just S. of line of modern wall.
