

2045 large circular patch of disturbed stones: p.h.? Below (3)
at top end of bank F.2010. (Not a feature).

Plan 3

2046 Causewayed ditch: continuation of 2035.

Plan 2 2047 Patch of burnt stones at top of bank (ie just behind S. of 2010) & below (3)

Plan 2 2048 Patch of v. small burnt stones w. soil, N. of 2047, sealed by (3)

● 2049 Ph? on E. edge of 2039, sealed by (4a). Circle of upright
Not planned stones w. much soil. Not a feature.

Plan 3 2050 Area of burnt small stones & burnt bedrock 40m W. of F.2046.
~~Sealed by F.2005 (2) (4) or F.2005 (2) (not clear).~~
~~Not a feature. Possibly a root, burning bedrock deeply.~~

2051 Small group of burnt stones below F.2010 (2). Not a p.h.

Not planned

Plan 2 2052 Small group of burnt stones below F.2010 (2) 2m N. of (A).

=2072

Plan 2 2053 Patch of burnt stones 3m. N. of (A) at corner of (V). Within F.2010 (3)

Plan 2 2054 2 burnt stones within F.2010 (3), 50cm E. of 2048.

Plan 2 2055 Small group burnt stones within F.2010 (3), 1m S. of 2052

Plan 2 2056 " " " " sealed by F.2010 (3). 1m NW of (A).

Plan 3 2057 ? PH. E. of 2039, sealed by (V) (4).

- F.2039 ① Medium sized stone rubble w. brown soil: identical to ① ⑤
 ② Medium sized rubble w. pink soil & grey leaching effect.

F.2044 ① Medium rubble: tightly packed deliberate infill, sealed by ① ② & F.2009 ③.

2046 ① Stone rubble w. brown soil matrix = 203S ①
 ② " " " pink/red soil = 203S ②

N

F.2035, F.2036, F.2037. (SEE SECTIONS P. 14, 26).
(= F.2046)

F.2035 & 2036 were ditches with a v. narrow causeway separating them. Depth: 1m (2035), (2036). F.2035 was 2m long. Its width not known, but probably less than 2m - perhaps extends $\frac{1}{2}$ m E-wards into bank. Rather ragged edges to both ditches, both of which belong to the pre-bank causewayed line.

F.2037 was a W-wards continuation of F.2036, taking advantage of a joint line. The fill of F.2037 clearly indicates that it ran W-wards, thus perhaps taking the small ditch series into an oval ring of holes.

F.2046 (F.2035)

This 'ditch' was wide & shallow & similar to F.2039. Its depth increased in 2 places where it took advantage of bedrock weaknesses. At its NW end it curved around W-wards & petered out, with no N. edge at all.
