~~COMMENT~~

These two post holes appear to be contemporary with each other, and neither were obvious until we had cleared up the area around the hearth.

PHASING

These two post holes (817+818) appear to be contemporary with each other, and neither were obvious until we had cleared up the area around the hearth.
One drawing inc.

Description continued

This one is nearer to the hearth than 817.

Other than the odd pink chipple and very small pink stones (large rabbit dropping size) there are no burnt stones, certainly no grey burnt stones from within the post holes F817 & F818 infill.
