COMMENT

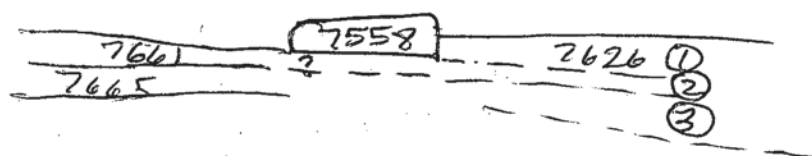

NO
Is this a pit? or does it extend beneath rampart + rampart rubble. It stops in a SW-NE line at the W-ward limit of the red banded P.Z. core material that has perhaps moved W-wards slightly on destruction of rampart.

PHASING

See PWD's comments for dating.

N.

S.

30-8-86:

7626 seems to have 3 layers:

- ① Dark soil as originally identifying it
- ② Small very compacted stones (identical to 7661, with which it may be contiguous, if not a continuation)
- ③ Dark soil as per ①.
