ASSOCIATED FEATURES ? 7257, ? 7256, 7221, 7222, 7223.

ASSOCIATED FINDS Pot, burnt bone, May still grit.

COMMENT Removal of a further 2-4 cm of soil revealed uneven layer of medium-sized stones, that is, characteristic 7211 material, so assumed to be no more a feature than the several other groups of burnt stones in 7211. But (10.9) realized that the stones at the s. end of this feature, which include burnt ones, form part of the n. end of 7257, which runs parallel to the possible wall 7256, and that its w. extremity abuts 7283.
