COMMENT ? Possible posthole.

PHASING 22.8 Layer of stones and soil removed to establish whether burnt stones visible in adjacent area of G17 - at slightly lower level than 7245 - continued into G16. No burnt stones appeared; the underlying material proved to be characteristic of 7410/7289. Lack of time precluded further investigation.

? 12.9 Was noticed that some burnt stones appear in 7245 on plan 3: presumably removed with 7289 (first removal).  
? Not a feature
