ASSOCIATED FEATURES ? 7256

ASSOCIATED FINDS None

COMMENT Perhaps associated with larger stones of 7256. Removal of large-to-medium stones - single layer - revealed characteristic 7211 material on the s. side and chippie of 7254 on the n. side. May be related to 7283 via 7224, some of the s. edge of which is formed of the stones at n. end of 7257. Runs parallel to postholes of longhouse as well as to 7256.

PHASING ? f. A.
