COMMENT

Large 1st slabs almost on bottom of ditch F1802
At its S. most terminal below F1802 (6). 2 butchered
bones found in ~~overlay~~ rubble layer F1802 (6) which
overlay F1802 (7) a dark grey soil and rubble mass,
which had been tipped into a sub-rectangular trough
cut in the bedrock F. 1856. The soil may have
been ash the trough: a cremation pit, making the slab
a cist.
