

CH₈₀

CONTEXT F₃₈₁₆.....

CUTTING N7 (extends into N8, M7, M8)

DATE EXPOSED DATE COMPLETED

DESCRIPTION An area of intense burning was uncovered in the bottom SE corner of N7 after removal of topsoil, layer ②. This consisted of many small burnt blocks, and in the centre, large flat slabs not as burned. At this stage it was recorded (Plan 3). The small blocks were broken away and it was replanned (see over). The feature was then sectioned to reveal that it merely sat on top of dirty gull material F3841 and partly compacted surface F3883.
