why.....

Geobase code:

DESCRIPTION

Widespread area of extremely weathered large stones
Has a definite edge at SE 16.4 N
Possibly a sub-platform layer - a flattening
of the area before the platform 16506 was laid

Comments

This area has clearly been exposed - weathered not worn. 6.8.93
the "weathering" may not after all be that; it might be attributable to
the composition of the rock here, much of which is fossiliferous.
