COMMENT

P.T.O. 3/4 sketch plan

The general worn aspect of so many small stones and some larger ones suggest this area was a surface trampled in antiquity.
It is hatched in yellow on Plan 3

7.8.88 it seems the small worn stones of 8512 have been
PHASING kicked up against Sides of 8526 all around it.

A bank of this material 0.50m wide is left from 4.1E
— 4.6 E running N-S from 2.0N - 5.0N
