## ASSOCIATED FEATURES

See 8168 8129

## ASSOCIATED FINDS

Charcoal, bone

8513 unfinished; eastern ~~set~~ part untouched and needs excavating. Western part, partly excavated. North part only had top 2 or 3 cms removed. Needs to be soil sampled?

## COMMENT

P20 Sketch plan

Although this appears to be the same feature as 7908 in P3 the stones tend to lie west-east if they have any sense of orientation, while in 7908 they clearly go south-north and are set vertically.

## PHASING

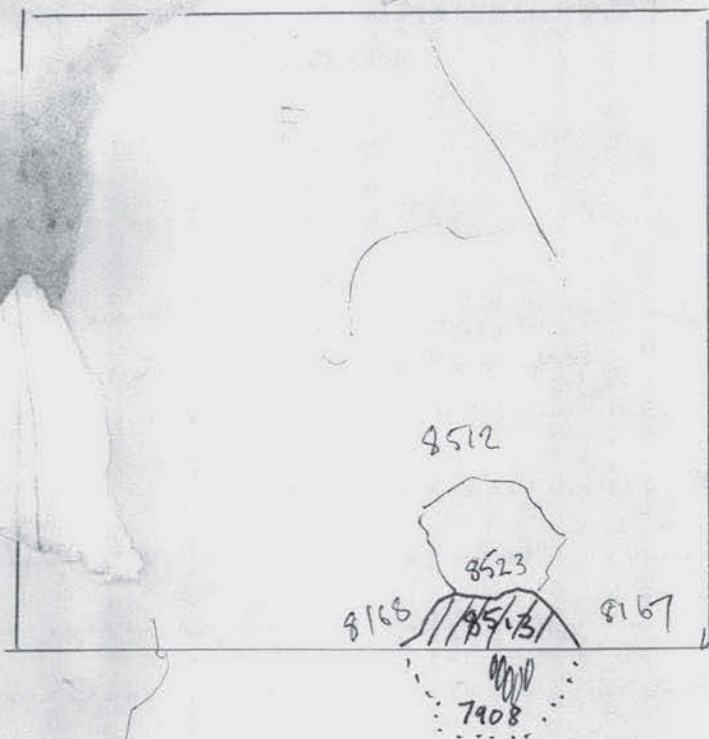

14.8.88 at 60cms depth the bedrock was reached with c. 10 cms

of grey "leached" material above. However even this material contained finds such as a cow's tooth.

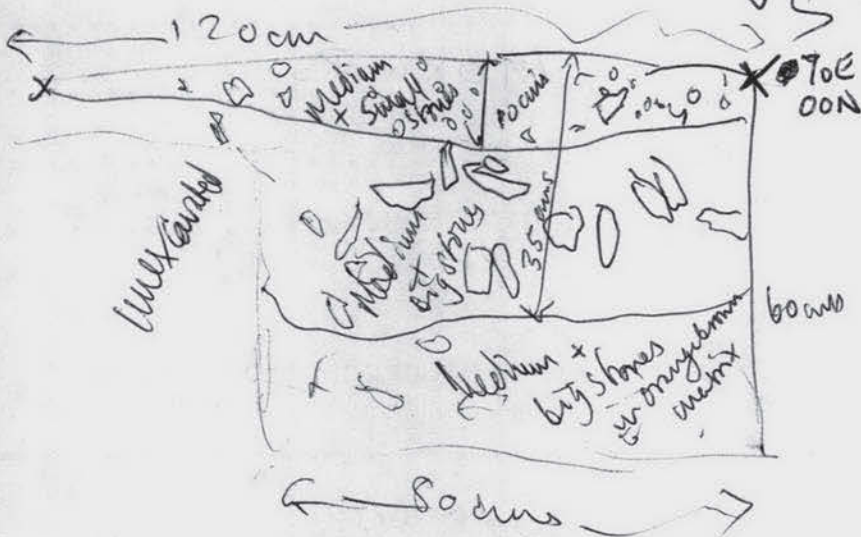

Although excavated in 60cms depth in one square, and generally down to 22cms, layers in 8513 were not differentiated. So finds at different depths can only be tied in with the date. - later the date, deeper the find.
