ASSOCIATED FEATURES 19.8.88 This feature has been unexcavated SW and NE quadrants, and the NW quadrant may not be down to bedrock. More careful digging in future may clarify what this pit really is.

ASSOCIATED FINDS Undetected on plan 3. But it was probably there unnoticed and only came to light with weathering.

COMMENT PTO sketch

PHASING This pit certainly seems to have had one posthole at eastern end, and possibly one or two more on western side. NW and SE quadrants were excavated, and the other two quarters were left in situ.

Burnt stone imbedded in leached grey material at 30cms depth. We are not positive we have the base on the north or south sides of the western end.
