Geobase code:

DESCRIPTION

Area of principally chert forming a band on the upslope part of the W. side of L.M. The chert has a mottled yellow colour. An excavation it was well defined - seemed to be placed here - being fully within the ~~main~~ layers in its vicinity. It was not horizontal but was thicker on the down slope side (i.e. at N. end at S end). Some down slope slip has occurred ~~at~~ 9532 3 sealed by

Comments

A probable deliberately laid floor levelling layering for a structure defined by the "House plans"
