ASSOCIATED FEATURES *5566?*

ASSOCIATED FINDS

COMMENT This appears to have been laid against the raised edge of 'packed' under angled shale 5768, to form a gentle slope. Material? derived from above 5741 near the shallowness of 5749. back of slab on its end.
Laid on 5674 against foreset on 5566. Thicker when it touches the 5566 line and including several pieces at an angle dipping from 5566 down towards 5674.
